

VODIRALL ECO

Resinous aluminum, reflective, water-based, with very high yield

LT	PACKAGING
5	metal drum
10	metal drum
18	metal drum

FEATURES

VODIRALL ECO is a bright silver protective coating, innovative in formulation as it is completely ecological and non-flammable. These requirements make the product easy to store as it is not dangerous, even if stored in large quantities.

PRIMARY USES

VODIRALL ECO can be applied on any type of dry substrate but finds its ideal location as a protective coating of prefabricated bituminous membranes on which it will produce a brilliant silver-colored, homogeneous and streak-free film. The film made with **VODIRALL ECO** is also sufficiently flexible.

INSTRUCTIONS FOR USE

VODIRALL ECO is ready for use. Vigorously mix the product in its package. Wait at least 60 days for application on new bituminous membranes.

Consumption: from 0,100 to 0,200 lt/mq

Application: roller, brush or airless pump

Storage: 12 months in original cans
